PROFILE

Experienced backend engineer with over nine years of expertise in designing **distributed systems** and building **scalable, high-performance** microservices-based SaaS platforms. Skilled in modern technologies and team leadership, with a strong focus on delivering reliable, fault-tolerant systems and mentoring developers to achieve excellence.

SKILLS

Languages	Java, JavaScript, Python
Databases	MySQL, Redis, ClickHouse, MongoDB, Cassandra, Snowflake, Postgres
Frameworks	Spring Boot, Node.js, LangChain
AI/ML	LLM Chatbots, AI Agents, MCP Servers, RAG, Tool/Function Calling
Others	Distributed Systems, Scalable System Design, Microservices, High Availability, Web Sockets, JMeter, Elasticsearch, Docker, Kafka, NGINX, Git

EXPERIENCE

TECHNICAL LEAD, Omnicom Global Solutions (Flywheel Digital) June 2026 – Present

- Leading a team within the **Commerce Cloud**, owning and maintaining **data pipelines** that power reporting and analytics for Commerce IQ, retailers, and sellers.
- Driving the **scalable system design**, reliability, and fault tolerance of large-scale **distributed** data ingestion and processing pipelines built for **high throughput**.
- Partnering with product and analytics stakeholders to deliver actionable commerce insights to retailers and sellers.

TECH: Spring Boot, SQS, Lambda, Datadog, Snowflake, Postgres

TECHNICAL LEAD, Vymo Technologies Sept 2022 – June 2026

- Leading and managing a team of five backend developers, including quarterly delivery planning, story creation, and overseeing team execution to ensure timely and high-quality deliverables.
- Managing and enhancing the existing legacy goal service while leading the design and development of new features.
- Designed and developed a **Performance Dashboard** introducing multiple new services, including:
 - **Performance Summary:** Displays all goals for each user.
 - **Key Insights:** Highlights team members performing well or underperforming, with the option to nudge them for improvement.
- Built an **Earning Service** comprising three major features:
 - **Commission Tracking:** Displays monetary commissions earned and their complete payment lifecycle.
 - **Rewards Module:** Shows the rewards users are eligible for and their achievement progress.
 - **Level Progression:** Enables participation in tier-based programs where users can advance levels based on points earned.
- Implemented seamless data migration for legacy services from **MySQL to ClickHouse**, ensuring improved query performance and scalability.
- Designing a **horizontally scalable, distributed ClickHouse-based** metrics data store supporting **high-throughput, low-latency** near real-time analytics.
- Created an **OnCall AI Slack bot** to answer issues related to services owned by our team, reducing on-call workload.

TECH: Spring Boot, Node.js/Express, MySQL, MongoDB, ClickHouse, Elasticsearch, Kafka

SOFTWARE DEVELOPER - II, 247.ai

Oct 2018 – Sept 2022

- Designed and developed **fault-tolerant, high-availability** functionality in the Co-browse application, a **distributed** Web Socket-based HTML content-sharing tool.
- Designed and developed the **Resume Policy** feature in the 247.ai Vivid Speech Web Socket application. The feature enables user sessions to be retained during network glitches or application reloads.
- Designed and implemented **API-based integration** between the Contact Center (CC) tool and the 247.ai Active Share product, which was previously integrated only through browser-based post messaging.
- Created a **performance measurement suite** to benchmark the 247.ai Active Share product using Apache JMeter.

TECH: Spring Boot, Node.js, Redis, Web Sockets, Cassandra, MySQL, JMeter

SOFTWARE DEVELOPER - I, 247.ai

Jul 2016 – Oct 2018

- Designed and developed a Client Onboarding Portal for 247.ai that automated client and product onboarding, reducing the process time from one month to just two days.
- Developed a **User Management Portal** as a wrapper on top of Okta user management to integrate with the client administration portal.
- Designed and developed a **Self-Serve Portal** to configure and manage existing clients.
- Created multiple **code deployment cookbooks** for various services used at 247.ai.

TECH: Spring Boot, MySQL, ReactJS, Chef, Okta-OAuth

EDUCATION

2012 – 2016 **Bachelor of Engineering (8.2 CGPA)**

B.E. (Hons) Electronics and Instrumentation, Birla Institute of Technology and Science, Pilani (BITS)

2010 – 2012 **Senior Secondary School (92%)**

Delhi Public School, Ranchi

1999 – 2010 **Secondary School (10.0 CGPA)**

Kairali School, Ranchi

ACHIEVEMENTS

- IIT JEE Rank: 7931 (AIR)
- Nettech Certification: Ranked 7 among 125 participants
- Received merit scholarships for all semesters at BITS Pilani
